SPECIFICATION:

Wire Diameter:	0.5-2.6mm
Min. Inner Diameter:	50mm
Max. Outside Diameter:	350mm
Max Height:	100mm
Max Winding Rotation Speed:	100rpm/ min
Machine Tool Power:	1.5kw
Machine Size:	700*1000*1300mm

GW-F60-Y CNC winding machine for current transformer is the new generation of winding equipment according to the power industry requirement and present manual winding technology current transformer

This machine adopts the international most advanced PLC system, it sets the procedures through the display screen so as to extremely strong the reliable operation of the whole machine. Its electric parts are designed in modularization. Which can reduce the maintenance cost. The main driving operation uses the frequency-conversion speed adjustment mode, which keeps the advantages of short driving chain. large startup torque, wide speed adjustment range, energy saving and low noise, The winding distribution adopts the stepping motor and high-precision reduction gear, which can solve the problem of traditional mechanical gear driving: error and uniform distribution.

Such winding distribution control is the breakthrough of circular winding machine, and can realize the continuous stepping stepless adjustment from 0.01mm, and bring the convenient adjustment, high distribution precision and large torque.

Due to PLC programming technology, it has the machine tool wire storage automatic computation, automatic counting, automatic stop, stop memory and so on, and simplifies the operation greatly. This machine has the multi-wire winding mechanism which can realize the dual-wire or multi-wire multi-layer winding, so as to overcome the technology difficulty of multi-wire circular coils winding of precise current transformer and to improve the production efficiency and product quality.

To sum up, GW-F60-Y CNC winding machine for current transformer is featured with high precision, wide application range, reliable system operation, it is specially used for winding the circular coils of the small batch and many varieties. Therefore, it is the preferred device in the transformer industry and the domestic most advanced circular winding equipment.

GREWIN INDUSTRIAL GROUP CO.,LTD.

Add: The fourth floor A-A3 zone aviation business area, Dongli Distr, Tianjin, China.

PRACTICAL APPLICATION :

TRAINING CUSTOMER TO OPERATE WINDING MACHNE :

- 1.All service engineers with 10 years experience are gotten special technology training, who can deal with various breakdown problem.
- 2.Guide the user to use accurately and how to maintain the Hook Type Transformer Winding Machine.

Provide free consultation about production process technology of electronic products.

- 3.In order to guarantee the machine used normally, we'd have training on how to operate, use and maintain our product by English manual, video, guiding on line.

PACKAGING:

Packaging Material: Carton/Wooden case with foam inside.

1.General package(Paper carton or plastic bag): For small equipped parts for Hook Type Transformer Winding

Machine, Package it with form and pack paper to guarantee unbroken during the transport.

2.Wooden case package: For larger scale Hook Type Transformer Winding Machine,we have special skilled

carpenter, who would make the proper wooden case with exact thickness,density,length. The up arrow ↑marked on the outer wooden case. Buffer material would be put in the wooden case to prevent crack and shock.
